BITCOINCURE

Investing in Lives!

INDEX

1.   Presentation

The humanity does not walk alone, we are dependent on each other to get somewhere in life, be it in status, power, conquests and achievements. The lack of planning for social works and humanitarian aid has been a major problem encountered in all "Bitcoins" that you have known to this day.

The main idea behind the creation of Bitcoin and its other Fork's were to be used as new ways of payments and financial transfers, as well as the famous digital investment method, which is apparently a new and great form of financial return. They all are deficient, because they do not reach social actions and do not add in methods of aid to the human beings in their afflictions and difficulties.

In order to change the concept of cryptocurrency, several researches were done on problems faced around the world. It was intensified the search for information in the area of health and what could be done so that people had a better quality of life fighting some diseases. The result showed with worrying data regarding Childhood Cancer, which today is the second largest cause of mortality of our children, mainly in Eastern and Southern Europe, Asia, Africa and South America.

After this research, we verified that there would be a new form of help and social responsibility with the humanity. In this way, **Bitcoin Cure** was created, which is responsible for voluntary actions to combat childhood cancer.

Bitcoin Cure represents a community of entrepreneurs who invest in lives, conducted solely and exclusively by you, dear investor, without any CEO, no entrepreneur, only Community.

We understand that without community, there is no strength, progress and no success. For this reason we love our community and believe that after reading this Whitepaper, you will have enough reasons to be part of this group.

2.   Criptocurrency

Criptocurrency is a form of virtual currency, it is a way of exchange that uses encryption and blockchain technology to ensure more security in financial transactions on the internet. Just as the traditional paper currency has serial numbers, watermarks, embossing, and other features to prevent counterfeiting, crypto-currency also uses codes that are very difficult to break.

There are several types of virtual currencies, bitcoin being the most known. It is decentralized, which means that money can be transferred from person to person without going through bank or intermediary without bureaucracies. Its negotiation takes place through the internet, carrying out transactions in any part of the world.

The main function of cryptocurrency is to facilitate financial transactions, ensuring practicality and speed for various purchase and sale transactions.

3.   Blockchain Technology

The technological innovation behind cryptocurrency is known as blockchain or "trust protocol" which aims at decentralization as a security measure.

In the blockchain, a global index is created for all transactions within the same market, which consists of records bases, being a kind of ledger, totally public and shared. The transaction is made between two parties directly, without the mediation of third parties, creating trust between the parties.

The blockchain of a virtual coin is initiated from the genesis block, which is the first block, the beginning of the whole system. Information on addresses, balances, debits and credits are shown publicly in the blockchain.

For a virtual currency, a block explorer is created, which is associated with a website on the internet, where all currency transaction information can be viewed. The transactions are irreversible, without breach, showing security and trust.

4.   Bitcoin Cure

As mentioned earlier in our presentation, there is an interest in delivering humanitarian aid, with the idea of bringing together technology and social action. In this way, Bitcoin Cure was created, a revolutionary currency that will benefit people who fight daily in the fight against Childhood Cancer.

4.1. Bitcoin Cure's Social Project

When conducting the research on the biggest causes of deaths worldwide, we are faced with this worrying situation of Childhood Cancer. The Bitcoin Cure coin was created to bring benefits to these children (who carry this disease) who need help in combating Childhood Cancer. Through the currency, financial resources will be offered that will help in treatments, medicines, equipment and the use of means of transport that facilitate the locomotion for chemotherapies and hospitalizations.

The **Bitcoin Cure** will constantly strive for the lives of these children with cancer, but for this project to be sustainable, we will depend on each investor who, by embracing the cause, will help **Bitcoin Cure** bring this benefit to worldwide treatment for Childhood Cancer.

4.2. Tecnologies

It is undeniable that we are dealing with the two major technologies, in matters of revolutionary, secure transactions and admirable electronic privacy never seen in the digital world, Blockchain and Tangle (Dag). To our knowledge, **Bitcoin Cure** will use the Blockchain system, but not because the Dag system is incompetent, on the contrary, its intelligence is commendable. However, the Blockchain system has already been showing its potential for almost 10 years, and therefore has impeccable time in its technology, attracting the attention of some banks like Itaú, Santander, Barclays, BBVA, Commonwealth Bank of Australia, Credit Suisse, JP Morgan, State Street, Royal Bank of Scotland and UBS. With **Bitcoin Cure** it could not be different, we were also attracted to being next to this system, in which Bitcoin was born.

With technological advancement, more and more people are using their mobile phones on a day-to-day basis. Concerned about this, we will have the **Bitcoin Cure** portfolio available for Android and IOS systems in the near future.

4.3. Inovation

Currently, many criptocurrencies use the concept of Masternode, becoming increasingly popular as it is an efficient form of financial return.

The masternode is a system working as nodes that help the network to ensure greater efficiency in the transactions. It's like a special server active all the time. It is an alternative for community members to keep a specific amount of coins and receive rewards for it. This amount of coins and the reward amount are determined in the criptocurrency code configuration

By maintaining an active masternode, it is possible to receive desirable rewards while maintaining a stable return on investment (ROI).

In the future, the concept of masternode for **Bitcoin Cure** will be adopted, which will be announced in the media and in a new version of Whitepaper.

Currently the currency has the concept of POS (Proof-of-Stake) and PoW (Proof-of-Work). In the POS system, the user needs to have a certain amount of coins in the wallet, which shows that he believes in the project. That way, he earns coins at the percentage set in the currency code according to his balance. In the POW system the computational power is used for coin mining.

Two inovations will be adopted by the team: Gemini Swap and Fork of the Trinity.

The **Bitcoin Cure** will bring a totally different Swap from the others. Something new that promises to bring great benefits to those who are part of this community. We ask atention to our social media not to miss the exact Gemini Swap date on our Road Map.

Our community will receive due recognition for the excellence and innovation that **Bitcoin Cure** will bring to all those who bet on our news. The Roadmap will be available with all the information and will be periodically updated on our website.

The **Bitcoin Cure** is bringing to the worldwide market of Altcoins the different and innovative, with a greater purpose through our social actions, which is the main objective.

4.4. Business model

During the development of the project, a sales platform will be created where the only purchase currency will be **Bitcoin Cure**. Initially there will be two shopping options:
→ Electronic products and computer parts and gadgets in general with almost cost prices.
→ Products to support the fight against childhood cancer, such as pens, calendars, cups, T-shirts and other utensils, from which all proceeds will be donated to other institutions that help fight childhood cancer.

The Bitcoin Cure team will have a unique and transparent "100,000,000" BTCC Proof-of-Stake to stakes generation that guarantees resources to keep our social action alive. This is a team strategy to have a sustainable and solid project for at least five years.

4.5. Coin Specification

Name: BITCOIN CURE
Ticker: BTCC
Algorithm: Scrypt
Type: POS
Maximum supply: 1,950,000,000
Premine: 450,000,000
p2p port=37442
rpc port=37443
Block Time: 1 min.
Minimum stake age: 3 hours
Coinbase maturity: 10 confirmations
Max block size: 2000000

ROI:

$\rightarrow$ 60% annual until Block 129.600 (08/12/2018 until 11/12/ 2018)
$\rightarrow$ 120% annual, from block 129.601 until 259.200 (11/12/ 2018 until 02/12/2019)
$\rightarrow$ 60% annual from block 259.201 until 388.800(02/12/2019 until 02/12/2019)
$\rightarrow$ 30% annual from block 388.801 foward (05/12/2019 foward)

- Pre-saleR$0,01 (US$0,0025) – August 16 until October 11 of 2018
- Starting at exchanges – October 12 of 2018

- Gemini Swap
- Masternode – May of 2019
- Fork of the trinity – August 12 of 2019

Maximum supply: 1.950.000.000BTCC
Stakes wallet to help with the donations: 100.000.000 BTCC

5. Road Map

T3 2018
- → Blockchain Launch
- → Windows Wallet
- → Social Media
- → HotSite Online

T4 2018
- → Official Site
- → WhitePaper Launch
- → Cryptocurrency Launch
- → First Exchange
- → Road Map Launch
- → First Social Action about Childhood Cancer

T1 2019
- → Marketing Activities
- → Gemini Swap
- → Masternode
- → New donations

T2 2019
- → Launch at a new Exchange
- → New donations

T3 2019
- → Mobile Wallets
- → Launch at a new Exchange
- → Fork Of Trinity (first part)

T4 2019
- → Exclusive webshop with BitCoin Cure only payments
- → Fork Of Trinity (second part)
- → End of the year special offert
- → Launch at a new Exchange

6.   Disclaimer

The Bitcoin Cure Team hereby disclaims any liability for any actions performed with the currency by the user.

This document is not intended to guarantee any profits from the presented currency but rather to present on its origin and purpose.

Profits are consequences that all team and investors expect, but will only occur due to various factors such as the economy, sponsors, investors, work, time, patience, acceptance, growth, among others.

All future investors should analyze any risks in relation to virtual currencies and study the details of each investment asset.

We suggest reading the document completely, doubts can be answered by our media.

7.   Thanks and a Message

Our eternal Gratitude to Bitcoin for the worldwide technological and financial revolution. If it were not for him, we would not be here. Gratitude to the master Bitcoin.

Thanks to all the investors, developers, viewers and everyone who took the time to read this document.

An exclusive thanks to the "DEVS" of the other serious coins and their respective true teams that exist in the World that are coming to give alternatives of quality of life and chance of together, to look for a WORLD FAIRER AND BETTER.

We can not stop or waste time, because the World needs many more coins that have projects like **Bitcoin Cure**, which has come to bring peace, joy and hope to these children with Cancer and their families, united by **WORLD HOPE**.

We will leave this important message to the developers of other altcoins:

We do not come to bring "DIVISION" but "UNION", for our Struggle is against the World Oppressors who plant "INEQUALITY" and "FINANCIAL SLAVERY", bleeding our Nations and our Cultures.

Team BITCOIN CURE.
